Education

Honours Computer Science (Co-op) & Statistics Minor
McMaster University (3.8/4.0 GPA)

Expected April 2027
Hamilton, Ontario

- **Awards:** McMaster Award of Excellence, Dean's Honour List, Global Experience Award
- **Extracurriculars:** Google Developer Group, DeGroote Finance & Investment Council, CS Society, DeltaHacks, Intramural Sports

Experience

Acceldata | Sales Engineer

Sept. 2026 – Present

Airflow, Kafka, Spark, AWS, Azure

Kitchener, Ontario

- Partnered with prospective clients to understand technical and business requirements, delivering tailored product demonstrations and solution recommendations that addressed key pain points and supported the sales process.
- Collaborated with sales, engineering, and product teams to design technical solutions, answer integration and implementation questions, and translate complex product capabilities into clear business value for customers.

Scotiabank (Global Markets) | Market Risk Engineer Co-op

May 2026 – Aug 2026

Java, Dropwizard, Cassandra, OpenAPI/Swagger, Docker, Maven

Toronto, Ontario

- Built Java REST APIs and CSV-processing workflows that ingest multiple datasets, normalize and classify records, generate derived historical outputs, and package results into validated ZIP artifacts
- Implemented business-rule classification and data transformations using reference metadata, configurable input lists, matrix-data handling and delivery-term calculations.
- Designed Cassandra persistence schema and added JUnit regression for output generation, integrity check, completion artifacts, deterministic processing, and dat-classification scenarios.

Scotiabank (Global Wealth) | Software Engineer Co-op

Jan 2026 – May 2026

Java, Spring Boot, Next.js, Fast API, Playwright, PostgreSQL, Cosmos DB, Azure, Docker

Toronto, Ontario

- Built a **CRM platform** that centralized client data for wealth advisors, cutting data-collection time ~40% in pre/post workflow benchmarks.
- Shipped an **LLM chat assistant** letting advisors query client context in natural language, with multi-agent routing, session persistence, and Cosmos DB caching over PostgreSQL storage.
- Built a **QA automation platform** that generates user stories for a target application via an API-driven flow and auto-executes them as **Playwright** test runs, cutting manual test-case authoring time for the QA team.
- Designed a **human-in-the-loop approval gate** before test execution and a finalized, debuggable **test report** after each run, giving QA full visibility and sign-off control over automated coverage.

TFI International | Data Engineer Co-op

May 2025 – Dec 2025

Python, Azure AI, MongoDB, SQL, Selenium, CI/CD, Unit Testing

Mississauga, Ontario

- Engineered an **OCR document-extraction platform** on Azure AI that standardized validation pipelines across departments, cutting per-document processing time ~30% (measured from processing logs).
- Built a **Python/Selenium bidding bot** that scraped and ranked freight offers against real-time logistics data; monthly load reports showed ~40% more truck-load acquisitions after rollout.
- Eliminated most manual data entry for operations by building **integration pipelines** syncing internal databases with external RESTful APIs and third-party platforms.

JOAS Korea | Full Stack Software Engineer Intern

May 2024 – Aug 2024

React, TypeScript, Next.js, Tailwind CSS, MongoDB, Firebase | www.joasnetworks.com

Seoul, Korea

- Launched JOAS's **first international website**, built for global traffic, driving a 10% lift in overseas web traffic.
- Implemented multilingual SEO (hreflang, structured metadata), Google Analytics event tracking, and image/bundle optimizations to improve search visibility and load performance across regions.

Projects

Shuttle Now | React Native, Crowdsourcing, GPS |  GitHub

Sept. 2023 – May 2025

- Architected a **crowdsourced GPS shuttle-tracking platform** (React Native) and drove it from prototype to formal pitches with Voyago Transportation, Attridge Transportation, and McMaster Parking & Business Development.
- Led the software team shipping **live in-app shuttle positions** – real-time crowdsourced location data replacing schedule guesswork for students.

Gavel | React Native, Firebase, Nativewind, Gemini, OpenAI | <https://www.gavel-app.com>

July 2025 – Present

- Leading two software engineers building a **cross-platform mobile marketplace with real-time bidding** for products and services, with dynamic pricing and live countdowns.
- Shipped ratings & reviews, real-time activity feeds, saved/archived items, and moderation-aware notifications to build trust and repeat engagement.

Skills

Languages: Python, Java, C, C#, C++, JavaScript, TypeScript, SQL

Frameworks: React/React Native, Next.js, Node.js, Flask, Spring Boot, Dropwizard, Fast API, LangChain/LangGraph

Cloud & Data: Azure (AI, SQL, Cosmos DB), Google Cloud Platform (GCP), Firebase, PostgreSQL, MongoDB, Cassandra, Docker, Kubernetes

Tools: Git, Jira, Swagger/OpenAPI, Unix/Linux, CI/CD, RESTful APIs, OAuth2/JWT, Codex, Claude Code, Github Copilot
